

## About us

In the North of Norway, at the old harbor of Klo, you will find the brand-new facilities of Vesterålen Fishing. This location offers luxurious accommodations that ensure a great and unforgettable experience for those who have high expectations when it comes to the ultimate sportfishing experience in general.

You can choose to explore the sea on your own with our rental boats, such as the fully equipped ARRONET 23.5 ft aluminum fishing boats, that ensure the ultimate fishing experience, or you can opt for a guided tour with our experienced skipper Dave, who knows the best fishing areas. Skipper Dave will guarantee your ultimate guided fishing experience on his Arvor 25ft fishing boat. Our aluminum boats are powerful and ultrasafe and suited for the job. Every boat is equipped with 90HP Honda fourstroke outboards, depth meter, chart plotters, safety gear, fishing gear, etc. The facility has its own filleting house with professional equipment such as vacuum packaging machine and a cold store. Situated just aside the harbor and mooring places.

The fishing season for huge codfish is best from January to April, as it is their spawning season. From April until late August there is a phenomenal abundance of haddock, pollack, codfish, bergylt, halibut, mackerel, herring, sea-devil, sea wolf, salmon, ling and more. We especially recommend fishing for halibut from August to September.

Not only is this area perfect for fishing, but also for wale- and orka-spotting all year round. We arrange safaris that guarantee you spotting and photographing wales or orkas. During winter season you additionally can observe and admire the marvelous northern lights.

Visit our website for pictures that speak a 1000 words and testimonies of people that have become part of our family, because of that lifetime experience they had with us. We hope to welcome you at Vesterålen Fishing soon! Do not hesitate to contact and email us anytime for anything!
